THE

ELECTRICAL WORLD

AND

ENGINEER.

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS

VOLUME XLV.

JANUARY 7 TO JUNE 24, 1905.

NEW YORK:
McGRAW PUBLISHING COMPANY

INDEX TO VOLUME XLV.

GENERAL INDEX.

Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference.)

A

Accidents in factories, Prizes for the prevention of, 671
Accounts, Handling delinquent. By Winslow, 347
Actinium. By Debierne, (D.) 48
Adding machine, Electric, 733
Advertising. By Hammond, 1022
——Central station advertising, 1115
——Newspaper advertising for central stations. By Winslow, 589; *684
Agriculture and electricity. By Guarini, (D.R.) 640; Klippe, (D.) 942
Air:
——Mechanical transport of, 490
——Recorder of atmospheric ionization. By Nordmann, (D.) 810
Air compressor, High-speed, motor-driven, *774
Alarm, High or low temperature. By Darwin, (D.) *643
Allis-Chalmers Co.:
——Changes in sales offices, 316
——Photograph of, *262
Alternating-current instruments, iron in. By Sumpner, (D.) 112
Alternating-current waves:
——Photographs of, (D.) *487
——Record of, 462
Alternating currents:
——Development, 6
——Diagrams. By Karapetoff, (D.R.) 398
——Measurement of small currents. By Bedell, 1064, 1077
——Preventing excessive pressure rises, (D.), *548
Alternators:
——Action of the neutralizing field winding in series motor. Newbury, (D.) 593
——Alexanderson self-exciting, *936
——Angular displacement of revolving fields when connected in parallel, 12
——Armature windings. By Newbury, (D. R.) 1185
——Commutation at starting of alternating-current motors with commutator. By Latour, 97
——Cummutation during the starting period. By Latour (D.R.) 255
——Compounding of alternators. By Walker, (D.) 255; 922
——Crocker-Wheeler 4,000-Kw., *550
——Developments, 6
——4,000-Kw. gas engine driven, *37
——High-frequency alternator. By Duddell, (D.) 160
——Induction alternators. By Stanley, 1183
——Latour, with polyphase excitation, *937
——Parallel operation of. By Henderson, (D.R.) 726
——Parallel operation of gas engine driven. By Scott, (D.) 640
——Paralleling a 5,500-Kw. turbo-alternator, Interborough Rapid Transit Co., New York, 305.
——Paralleling of turbine-driven, 290
——Predetermination of the short-circuit characteristic. By Torda, (D.) *1131
——Proportioning slow-speed alternators. By Scott, (D.) 725
——Sectional frame for alternators, *468
——Testing alternators loaded on resistances. By Workman, (D.R.) 48
——Testing large machines, New method of. By Hobart and Punga, 745, 759
——Tests of 5,000-Kw. alternators of Interborough Rapid Transit Co., 893, (D.) 940
——Voltage drop, Methods for determining. By Drucbert, (D. R.) 726, 850
——Winter and Eichberg commutator machine, *1011
Aluminum, Production and uses of. By Smith, (D. R.) 400
Aluminum anode film. By Gordon, (D.) 442
Aluminum as an insulator, 426
Animas Canal Reservoir Water Power & Investment Co.'s plant, 74
American Association for the Advancement of Science, Annual meeting, 11
American Electric & Controller Co., 694, 945
American Electrochemical Society, 470, 749, 788, 845
American Institute of Electrical Engineers:
——Annual dinner, 15, 189, 240, 284, 329, Sup. Feb. 18
——Annual meeting, 922, 926
——April meeting, 842
——Asheville meeting, 961, 965, 1100, 1173, 1156
——Nationalization of, 1153, 1160
——February meeting, 421
——January meetings, 232, 285
——Photograph of annual banquet, Sup. Feb. 18
American Society of Mechanical Engineers, (D. R.) 113
American Telephone & Telegraph Co., Report of, 90, 574, 576
American Type Founders' Co., Individual motor-drives, *518
Ammeters:
——Calibration of. Freudenberger, 283, 302
——Induction coil, *71
——Troy, *263
——Westinghouse, *312
Anderson Mfg. Co. Time switch, *992
Arc:
——Alternating-current arc, Variations of. By Leonard, (D.) 547
——Carbon arc in vacuum. By Hoerburger, (D.) 1091
——Emission spectrum. By Kowalski and Joye, (D.) 1132
——Fluxes of light with varying power supply. By Dyke, (D.) 850
——Metallic arc, Experiments with. By Ladoff, 747, 757
——Phenomena, when placed in a magnetic field. By Child, (D.) 440
——Power factor of the alternating-current arc. By Shepardson, 1184
——Undamped electric oscillations. By Maisel, (D.) *442
Arc lamps:
——Carbons, Small-size. By Eastman, 722
——German improvements, (D. R.) 594
——Illumination from arc lamps with inclined carbons. By Monasch, (D.) *309
——Jandus, *314
——Modern lamps. By Howatt, (D.) 807
——Titanium lamps. By Ladoff, 747, 757, (D.) 1090
——Toerring constant-potential series, *67
——Variation of luminous flux of alternating current lamp. By Leonard, (D. R.) 640
Armature slot insulation. By Hobart, (D.), 980
Armatures:
——Armature coils and ozone. By Meyer, (D.) 397; Buechi, (D.) 546
——Average length of coil per turn of wire, (D. R.) 352
——Changing windings for different voltages, (D. R.) 352
——Drying and dipping in tramway repair shops, (D.) 982
——Drying out coils. By Arthur, (D. R.) 398
——Reaction of armatures in alternators. By Henderson and Nicholson, (D.) 439
——Testing in repair shops, Instructions for. By Weeks, (D. R.) 355
——Three-phase alternator, *650
——Winding for continuous-current armatures, Parsons patent, 382
——Windings for constant-potential, direct-current machinery, (D. R.) 398
——Windings of the closed-circuit type. By Cramp, (D. R.) 767
Arnold Company, 599
Association of Railway Telegraph Superintendents, 964
Atlas Engine Works:
——Boiler, *267
——Four-valve engine, *1095
Atoms, Constitution of. By J. J. Thomson, (D.) 770
Atwater Kent Mfg. Co.:
——Battery switch, *165
——Ignition apparatus, *1190
Auerbacher, L. J., Observations made by, relating to electrical matters, 1068
Australian patent office, 669
Automatic Switch Co., Motor starters, *654
Automobile battery switch, *165
"Automobile Builder," 92
Automobile Club of America, club house in N. Y. City, 426, 1007.
Automobile exhibition in New York, 163
Automobile speed indicator and counter, *73
Automobiles:
——Berlin Exposition exhibits. By Groddeck, (D.) 689
——Electricity and Automobilism, 89. By Leder, 254
——Energy consumption of electric automobiles. By Müller, (D.) 110
——Future of the electric carriage. By Chambers, (D.) 808
——"Gyroscope" motor truck, *1052.
——Industrial motor vehicles. By Perisse, (D.) 595
——Italy, Omnibus line in, 237
——London motor omnibuses, 180; (D.) 548
——Pneumatic and mechanical arrangements of electric automobiles. By Lacau, (D. R.), 47

B

Balancers, Direct-current. By Kennelly and Whiting, *38
Ball-bearings:
——Application of, to high-speed machinery. By Lysle, *771
——Electric motor bearings, *363
Bates, Putnam A., Biographical sketch of, *90
Bates Machine Co. Numbering machine, *65, *1139
Bates & Neilson electrically driven air pump, *54
Battery, Dean system, *307
Battery connection, *74.
Bell telephone managers' first annual convention, 420
Belmont, August, on municipal subways, 182
Belting, Schultz flexible, *775
Berlin Electrical Society, (D.) 49
Bertelli, Timoteo, Death of, 581
Bismuth:
——Change of resistance of. By Carpini, (D.) 111
——Crystallization of, in the magnetic field. By Leduc, (D.) 982
Bissell, F. Co. Pole seat, *363
Black, J. R. Electrical wire insulation, 208
Blake condenser, *950
Blake Signal & Mfg. Co. Staples, *70
Blast furnace gas, cleaning. By Sahlin, (D. R.) 1091
Blast furnace gas for the development of electric power. By Thomson, (D.) 485; *688; Rossi, (D. R.) 688, (D.) 941
Blaze currents. By Mrs. Waller, (D. R.) 691
Block signals. (See Signals.)
Blood, J. B., Biographical sketch of, *878
Blood, W. H., Jr., Portrait, *1111
Boat, Motor-driven, for oil transportation, Russia. By Hamilton, *714
Boiler manholes and handholes. By Strohm, (D. R.) 399
Boiler room economies, 803
Boilers:
——Atlas water-tube, *267
——Fuel economy in steam power plants. E Booth and Kershaw, (D.) 440
——Oil, Effect of, on ultimate strength of boiler, 889
——Raising steam in, 295
Bond tester, Roller direct-reading, *60
Book reviews:
——Accumulateurs Electriques. By L. Jumau, 401
——Alternating Currents. By G. T. Hanchett, 50.
——Ammaire pour l'An, 1905, 643
——Asynchronen Drehstrommotoren. By Gustav Bernischke, 730
——Bau der Dampfturbinen. By Alfred Musil, 443
——Berechnung Elecktrischer Leitungsnetze, Vol. II. By J. Herzog and C. Feldmann, 944
——Berechnung und Entwurf Electrischer Maschinen, Apparate und Anlagen. By F. Niethammer, 730
——Business Short Cuts, 598
——Contrôle des Installations Electriques. By A. Monmerqué, 810
——Credit Man and His Work. By E. St. E. Lewis, 902
——Dampfturbine. By Gabriel Zahikjanz, 443
——Dampfturbinen. By Hans Wagner, 443
——Darstellung des Zinks. By Emil Gunther, 49
——Dynamics of Particles and of Rigid, Elastic and Fluid Bodies. By A. G. Webster, 1189
——Dynamo, Motor and Switchboard Circuits. By W. R. Bowker, 598
——Electric Furnace. By Henri Moisson, 113
——Electric Lighting. By F. B. Crocker, 903
——Electric Motors. By H. M. Hobart, 903
——Electric Traction. By J. H. Rider, 691
——Electrical Trades Directory, 598
——Electrical Transmission of Energy. By A. V. Abbott, 355
——Elektrische Bogenlicht. By W. B. Von Czudnochowski, 902
——Elektro-Ingenieur-Kalender, 1905. By A. .I. Hirsch and F. Wilking, 944
——Elektrolytische Raffination des Kuppers. By Titus Ulke, 49
——Elektrolytisches Verfahren zur Herstellung Parabolischer Spiegel. By Scherard Cowper-Coles, 49
——Electromagnet. By C. R. Underhill, 598
——Elements of General Drafting for Mechanical Engineers. By C. E. Coolidge, 644
——Elements of Mechanical Drawing. By A. P. Jamison, 644
——Ferric and Heliographic Processes. By G. E. Brown, 691
——Forge Practice. By J. L. Bacon, 643
——High-Temperature Measurements. By Le Chatelier and Bondonard, 1043
——Imperial Directory and Statistics of Electric Lighting, Power and Traction Works, 597
——Kathaden und Röntgenstrahlen. By F. Neesen, 1044
——Kunstlicher Graphit. By F. A. J. Fitz-Gerald, 49.
——La Bobine d' Induction. By H. Armagnat, 855.
——Laboratory and Factory Tests in Electrical Engineering. By G. F. Sever and F. Townsend. 855.
——Lecons sur l'Electricitié. By Eric Gerard, 49

* indicates illustrated articles.

141473

Book reviews: (Continued.)
——Light Energy. By M. A. Cleaves, 599.
——L'Industrie Aurifere au Transvaal. By Albert Michaut, 113.
——Localization of Faults in Electric Light and Power Mains. By F. C. Raphael, 312.
——Manuale Pratico per L'Operaio Elettrotecnico. By G. Marchi, 401.
——Manufacturing Cost. By H. L. Hull, 312.
——Notices sur l'Electricité. By A. Cornu, 691.
——Polytechnic Engineer, 1188
——Prufund von Gleichstrommaschinen. By C. Kinzbrunner, 944.
——Radioactivity. By F. Soddy, 599.
——Registration of Trade Marks Under the New Trademark Act. By A. P. Greeley, 730
——Short Course in Alternating-Current Testing. By Fitzhugh Townsend, 691.
——Smithsonian Institution Report, 49.
——State and Territorial General Statutes Relating to the Use of Streets and Highways by Street Railway, Gas, Water and Electric Light Companies, 771.
——Structural Designers' Handbook. By W. F. Scott, 488.
——Telephone Service. By H. L. Webb, 691.
——Testing of Continuous-Current Machines. By Charles Kinzbrunner, 598.
——Theory of Alternating Currents. By Alexander Russell, 771.
——Transversal Dampfturbinen. By A. Patschke, 443.
——Universal Electrical Directory. By J. A. Berly, 598
Booster:
——Controlling separately excited field. By Nachod, *1171
——Crompton-McIntosh automatic reversible, (D.) 46.
——Use of batteries with reversible boosters. By Turnbull (D. R.) 210.
Boring and turning mill, electrically driven, *559
Boston Y. M. C. A., Training School of Applied Electricity, 87, 88.
Bowen, G. S., Death of, 334.
Brakes:
——Eddy current, for testing purposes. By Brion, (D.) 443; Morris and Lister, (D.) *983, 1094.
——Foundation brake rigging. By Dewson, (D. R.) 641.
——New electromagnetic brake. By Mattersdorff, (D. R.) 47.
——Straight air brake. By Dewson, (D. R.) 47.
——Synchronizing electro-magnetic brake. By Abraham, (D.) 688.
——Transmission gear of air-brake equipment. By Dewson, (D. R.) 400.
——Triple valves. By Dewson, (D. R.) 211.
Brass made in electric furnace, (D. R.) 311.
Bridge, Australian, electrically operated drawbridge, *730
Bridge, Fault-localizing, devised by Moore, (D.) 48
British National Physical Laboratory, (D.) 729.
Brooklyn Polytechnic lectures, 88, 184, 284, 328, 466, 507, 750, 1163
Brown, L. P., & Co. Soldering iron, *650.
Brunswick Refrigerating Co., 651.
Brush discharges and ionic mobilities. By Przibran, (D.) 1133.
Brush Electrical Engineering Co. Transformers, 646.
Brushes:
——Bronze carbon, (D.) 484.
——Copper-carbon. By Prasch, (D.) 687.
Buckboard, Making of an electric. By Brocksmith, (D. R.) 1133.
Buildings. (See Isolated plants.)
Bulkhead doors, Closing by electricity, *355.
Burke Electric Co.:
——Fire at works of, 602.
——Motor, *559.

C

Cable shields, Construction and installation of. By Schmidt, (D.) 1042.
Cables:
——Breaking of line wire. By Matt, (D. R.) 486.
——Carrying capacity of multiple cables, 462.
——Charging of a cable through a condenser and resistance. By Heaviside, (D.) 112.
——Choice of an insulated cable. By Clark, *1086, 1109.
——Construction and manufacture of high-tension cables. By Schmidt, (D. R.) 596.
——Data relating to electric conductors and cables. By Fisher, 1175
——Diagrams for determining the cross-section of conductors. By Hoppe, (D.) 1042.
——Electric cables. By Atkinson and Beaser, (D.) 651, *727.
——Heat in, Calculating. By Teichmüller, (D. R.) 549.
——Heat conduction in multicore cable. By Mie. (D.) 486
——Insulation resistance of high-tension. By Humann, (D.) 853.
——Laying cable, Proper method of. By Wordingham, (D.) 211.
——Lead-covered cable in England, (D.) 161.
——Localization of high-resistance faults. By Davidson, (D.) *354.
——Overhead mains. By Aldenbrooke, (D.) 596.
——Overhead vs. underground mains, 378.
——Paper insulation. Thickness of, 1175
——Protection of cables (D.) 1042
——Safety devices for high-tension lines, (D.) *441.
——Sarco fittings for steel armored cable, *775
Cables: (Continued.)
——Splicing cables, (D. R.) 400.
——Steel cables for conductors in transmission lines, (D.) 1042.
Cables, Submarine:
——Atlantic, British, 425.
——Atlantic, New Commercial cables, 381.
——Hardie and Lodge patent, (D.) 983
——Laying Yarmouth-Gorleston cable, (D. R.) 770.
Cables, Telegraph, Breaks during storms. By Maver, (D.) 355.
Cables, Telephone:
——Avoiding induction. By Schmidt, (D. R.) 689.
——Construction of, for the purpose of avoiding induction currents. By Schmidt, (D. R.) 48.
——Early history, 334.
——Long spans, 507.
——Multiplex cable, *651.
——Underground system. By Hultman, *1094.
Calcium, Producing metallic. By Goodwin, (D.) 354.
Calcium carbide, Use of as an explosive in mining. By Guedras, (D.) 486.
Calcium carbide electric furnace, *482.
Calcium cyanamide as fertilizer. By Frank, (D. R.) 442.
Calcium cyanamide process, (D.) 257.
Calibration of voltmeters and ammeters. By Freudenberger, 283, 302.
Calibrators for wattmeters, *61.
California Independent Telephone Association, 966.
Campbell Bros., Time switch, *813
Canadian Electrical Association, 925, 1159, 1165
Canal haulage, Electric, 1070.
Car test recorder used on Boston Elevated Ry. By Ayer and Knowlton, (D. R.) 310.
Car truck, Two-wheel. By Hilderbrand, (D.) 1041.
Car wheels:
——Manufacture of cast-iron wheels at Altoona, Pa., (D.) 210.
——Steel tire vs. chilled iron, (D.) 852.
Carbon, Granular, from Brazil, 449.
Carbon bisulphide, Electric double refraction in, 326.
Carbon filament, New. By Howell, *1182
Carbon filaments, Conduction losses from. By Hartman, (D. R.) 981.
Carbon-tetrafluoride gas, Production of, *724.
Carbonate in caustic potash. By Winteler, (D. R.) 162.
Carbons:
——Arc light, Some results with, *397.
——Use of small-size, in enclosed arc lamps. By Eastman, 722.
Cargo-boat, Electricity as a motive power for. By Hamilton, *714.
Carichoff, E. R., Biographical sketch of, *14.
Carnegie Institute, Pittsburg, 423.
Carnegie on engineers, 623.
Cars:
——Gasoline-electric motor car, *904.
——London Underground Electric Ry., *480.
——Motor car for single-phase and direct-current traction. By Cronbach, (D.) *1041.
——Motor cars of Chicago Elevated Ry., (D.) 899.
——One-motor equipment. By Price, (D. R.) 942.
——University of Illinois test car, 1120.
Cathode fall at hot carbon. By Cunningham, (D.) 642.
Cathode phenomenon, 72..
Cathode rays from electrolyte surfaces. By Schaefer, (D.) 1093.
Cells:
——Diaphragm, 306.
——Grouping of cells to obtain maximum current. By Goehr, 898
——Hulett low-voltage, *848.
——McDonald cell for sodium chloride electrolysis. By Rostosky, (D. R.) 442.
Central California Electric Co.'s plant, 74.
Central station advertising. By Winslow, 589, *684, 1115.
Central station buildings, 1163
Central station business, Methods of increasing. By Knowlton, (D. R.) 769; Mathes, 801.
Central station management. By Carson, 720.
——Credit question in. By Winslow, 477.
Central station payrolls and labor distribution. By Winslow, 151.
Central station superintendent. By Hubley, 933.
Central station taxes in Australia. By Hicht, (D. R.) 727.
Central stations:
——Areas of electric light distribution, 2.
——Bloomington, Ill., Public Service Corporation. By Robinson, (D.) 1091.
——Bluffton, Ind., Municipal plant, (D.) 353
——Boiler-room economies, 803.
——Boston Edison Illuminating Co., Central station design. By Moultrop, 228, 251.
——Brussels, (D. R.) 161.
——Central generating plant, Treforest, England, *191.
——Coal, Small size of, in power plant. By Moses, (D.) 352.
——Columbus, Ohio, Municipal arc lighting plant. By Wiler, *755.
——Connections during hours of light load. By Jacobi, (D.) *769
——Cook County Court House, Chicago, 695.
——Cost of electric power to consumers, Diagram. By Jones, 350.
——Cost of generating power at Sheffield. By Fedder, (D. R.) 640.
——Cost of power, Effect of load factor on, 303.
Central stations: (Continued.)
——Costs and losses in distributing circuits, Elements affecting. By Williams, 202.
——Costs and revenue, in Mass. By Knowlton, (D.) 942.
——Delray station at Detroit, *291.
——Denver, Central station development in, *1013.
——Design of engine rooms. By Lüpke, 629.
——Detroit plant, *243, 282, *291, 506.
——Economics of electric power distribution. By Bell, (D.) 688.
——England:
Colchester plant, (D. R.) 441
Treforest, the South Wales Electric Power Distribution Co., *191
——Escanaba, Mich., Municipal plant, 712
——Future distributing systems. By Snell, (D.) 109.
——Generation of power. By Emmott, (D.) 46
——Germany:
Statistics, (D.) 256; by Hoppe, (D.) 1091
Wiesloch station. By Collischoon, (D.) 353
——Gt. Britain, Statistics, (D.) 310.
——India, (D.) 595.
——Insurance on central stations. By Danforth, 483.
——Inverted rotaries in London tramway system, (D.) *110.
——Keokuk, Iowa, Plans for plant, 287.
——Ladermier, Switzerland. By Herzog, *1073
——Load diagrams and their uses, 327.
——London:
Lot's Road, Chelsea, *93
Power bills, (D.) 768
——Long Island power house of Penn. R. R., *41.
——Massachusetts, Report on, 705, 708.
——Medellin, Colombia, S. A. By Hines, 715.
——Motor hiring department. By West, (D. R.) 1133.
——Negligence, Law of, and electric supply companies. By Ball, 787, 799.
——N. Y. Rapid Transit Co. By Stott, (D.) 942.
——Old Colony Ry., *1079.
——Paris:
Discussion of best system for, (D.) 47, 424
Future supply, (D.) 689
——Paxtang Electric Co., Explosion near plant, 967.
——Philippine Islands, *835
——Physical comfort of the operating force and its relation to the cost of production. By Lüpke, 629.
——Protection for railway power stations. By Silverman, *1077.
——Scotland-Fife Electric Power Co., (D.) 161
——Single-phase, alternating-current distribution. By Rau, 204.
——Size of units in power plants. By Snell, (D.) 1132; Woodhouse, (D.) 1187
——South Norwalk, Conn., 290.
——South Wales Electric Power Distribution Co., (D.) 45; *191.
——Theft of current: how to detect, prosecute and prevent. By Hallberg, *794, *884.
——Winterthur, Switzerland. By Herzog, (D.) 689.
——Worcester Electric Light Co., 858.
——(See also Isolated plants.)
Chain, Morse, in motor driving, *1189
Challenge Mfg. Co. Primary cell, *946.
Charging for electric current:
——Detroit, Mich., 378.
——Different systems. By Stern, (D.) 727.
——Municipal lighting rates in Mass., 378
——Switzerland central stations, (D.) 1041.
Charging machine, Wellman open-hearth, *648.
Chemistry:
——Organic chemistry. By Mueller, (D.) 1043.
——Engine room chemistry. By Gill. (D. R.) 1132.
——Relation of physical chemistry to physics and chemistry. By Van't Hoff, (D. R.) 487.
——Technical chemistry. By Walker, (D. R.) 162, (D.) 354.
Circuit breakers:
——Direct-current, *991.
——I-T-E special, *56.
——Stone multivoltage, 333.
Cleats, Hard fibre, *74, *445.
Clip, Testing, *116.
Clock, Electric. By Fery, (D.) *597.
Clutches:
——Cutler magnetic, *710.
——Williams electromagnetic, *653.
Coal:
——Calorimetric testing of. By Hanchett, (D. R.) 768.
——Fuel value of coals. By Parker, (D. R.) 807.
——Production for 1904, 929.
——Small size of, in power plants. By Moses, (D.) 352.
Coal handling by electric motors, *606.
Coal-handling machinery as applied to the power house, *264.
Coffee-roasting and spice-grinding plant, Power installation of. By Knowlton, *678
Coherers, Experimental investigation of. By Fisch, (D.) 257.
Coils, Winding, for electromagnets. By Underhill, (D. R.) 1042.
Coke plant, Electric power in, (D. R.) 1132.
Coke-removing machine, Electric, in French gas works *143
Commercial aspect of engineering, 134, 236.
Commercial Electric Co. Variable-speed motor system, *554.
Commutation poles, Use of. By Pohl (D. R.) 1185; Defris, (D.) 1185.

* indicates illustrated articles.

Commutation of dynamos. By Catterson-Smith, (D.) 898.
Commutator truing device, Jordan, *68.
Commutators:
——Alternating-current motors, Deri patent, 674.
——Burning out of, (D. R.) 255.
——Grinding of high-speed commutators. By Crossen, 794.
——Refilling and comparing commutators. By Weeks, (D. R.) 352.
——Repairing. By Weeks, (D. R.) 640.
——Repairing pitted commutators, (D.) 45.
——Winding for three-phase motors, Alexanderson patent, *713.
——Windings for compensated repulsion motors. By Danielson, (D.) *806.
Compressed air in mining, (D. R.) 941.
Condenser circuits in wireless telegraphy, Damping of. By Drude, (D.) 311.
Condensing plants. By Allen, (D. R.) 640.
Conducting sphere in a rotating magnetic field. By Corbino, (D.) 1042
Conduction losses from carbon filaments. By Hartman, (D. R.) 981.
Conductivities of electrolytes in mixtures of solvents. By Jones and Carroll, (D.) 111.
Conductivity, Action of radium rays on, (D.) 809.
Conduit bending machine, *405.
Conduits of Canadian Niagara Power Co., *20.
Connecticut Telephone & Electric Co. Telephone, *117, *263.
Consolidated Engine Stop Co., 1050
Consumer's register, Loose leaf. By Winslow, 40.
Controllers:
——Design of, for crane and traction motors. By Edler, (D. R.) 1042.
——Machine tool controller, *62.
——Surface car controller. By Taylor, (D.) 310.
Controller for ship lamps, Russell & Stoll, *313.
Converters:
——Cascade converter. By Arnold and La Cour, Geitlinger, (D.) *209.
——Cooper Hewitt mercury vapor, *647.
——External reactance for synchronous. By Fowler, *1125.
——Inverted rotary, Voltage ratio of. By Clinton, (D.) 806.
——Latour single-phase rotary, 753.
——Rotary converters. By Workman, (D.) 640.
——Rotary converters and motor generators, 1113.
——Starting rotary converters. By Woodfield, (D. R.) 899.
——Synchronous converters. By Waters, 1183
——Testing rotary. By Workman, (D. R.) 767.
Cook, Frank B. Pole cable terminals, *214.
Cooking, Electric, 810.
Cooper Hewitt Electric Co., Converter, *647.
Copper:
——Analysis of refined. By Heath, (D. R.) 942.
——Conductivity of, (D.) 1092.
Cornell University, Higher education as influenced by, 874.
Cornwell, R. M., Co.:
——Dynamos and motors, *265.
——Switch box, *992.
Cost of manufacture, Calculating methods. By West, (D.) 729.
Couch, S. H., Co. Lamp guards, *166.
Crane Co. Valves, *73.
Crane companies, Consolidation of, 362
Cranes:
——Electric for heavy lifts. By Scott, (D.) 981.
——Electric traveling. By Herzog, (D. R.) 1040
——Various special forms of. By Horner, (D. R.) 353.
Credit question in central station management. By Winslow, 477.
Crescent Co. Time-switch, *363.
Crocker-Wheeler Co.:
——Alternators, *550.
——Photograph of members, *316
——Turbo-generating set, *732.
Current meter, Wattless, (D.) *1134.
Cut-outs:
——Automatic, for series arc lamps, *695.
——Discriminating cut-outs for alternating-current circuits. By Field (D.) 310; Andrews, (D. R.) 641.
——Paiste, *264.
——Time element thermal, (D.) *852.
Cutler-Hammer Mfg. Co.:
——Elevator switch, *814
——Magnetic couplings and accelerators, *772.
——Rheostat, *71.
——Speed adjuster, *910.
Cutter Co. Circuit-breaker, *56.
Cymometer. By Fleming, (D. R.) 902, 1188
